WE SECURE SUPPLIES
OF HOSPITAL
MEDICINES

AMGROS

We secure massive savings for the regions

Amgros secures the supply of drugs and hearing aids for public hospitals and hearing clinics.

We do this by organising and conducting tendering procedures and by procuring medicines and hearing aids for our owners, the regions. This saves the regions billions of DKK every year.

“

*Danes are living longer.
And we can treat more diseases,
because new and better medicines
are entering the market all the time.
This is a good thing. But it is expensive.
This is where Amgro comes in.*

Nina Uldal, director

How we secure supplies of medicines

Back orders are becoming an ever greater challenge, not only in Denmark, but throughout the world.

We are working systematically to reduce the number of back orders. As part of this work, we have joined the hospital pharmacies to establish a national buffer stock of medicines.

Another important element in securing supplies is the hospital pharmacies' production of SAD medicines for groups of patients with special needs. Amgro's owns marketing authorisations for these medicines, and we ensure that they meet all requirements from the authorities.

The national buffer stocks are crucial to secure supplies of medicines for public hospitals.

AMGROS AIMS TO BE
THE COLLABORATION
PARTNER THAT GETS
THINGS TO WORK
SUCCESSFULLY

Amgros runs common regional IT solutions to support the supply of hospital medicines and hearing aids. In this way, Amgros releases the regions from tasks that they would otherwise have to do themselves individually.

We are an important part of the health services

Denmark has developed strong and efficient national cooperation to secure supplies of medicines.

Amgros has a pivotal position in this context, because we work closely with the regions, hospital pharmacies, suppliers and all of our valued partners in the administrative and political systems. This enables us to understand needs as medicines move from manufacturer to patient.

It is a complex task. And we cannot do it alone.

We can only succeed if we work with all the relevant healthcare players. Therefore, dialogue is our most important tool.

Amgros can only be something if we work with others.

“

As a national procurer of hospital medicines, we at Amgros aim to use our influence to reduce adverse environmental and climate impacts from medicines, and promote responsible corporate behaviour. There is no doubt that this will present certain dilemmas. However, we are determined to find balanced solutions so that security of supply and sustainability do not become two conflicting factors.
